GURNOOR SINGH

Punjab, India | +91-7814205303 | noorsandhu803@gmail.com | LinkedIn - gurnoor-sandhu-743898286 | GitHub - noorsandhu803

Education

Thapar Institute of Engineering and Technology — **Patiala, India**
B.E. in Computer Science — *Expected May 2027*

Relevant Coursework: Data Structures and Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks, Artificial Intelligence

Experience

Xebia — **Jun 2026 – Jul 2026**
Full Stack Developer Intern — *Remote*

- Engineered enterprise Learning Management System (LMS) modules using React.js, JavaScript, Tailwind CSS, and Vite, translating complex business requirements into scalable and reusable software components.
- Architected secure Role-Based Access Control (RBAC) workflows for administrators, instructors, and learners, enforcing page-level authorization across application modules.
- Developed 10+ reusable React components using modular software architecture, reducing code duplication and improving frontend development efficiency.
- Collaborated within a 5-person Agile/Scrum engineering team using Git, GitHub, pull requests, code reviews, and CI/CD pipelines throughout iterative software development cycles.

Blue Stock FinTech — **Nov 2025 – Dec 2025**
Software Development Engineer Intern — *Remote*

- Developed and maintained full-stack web application features using React.js, Node.js, and Express.js across frontend and backend services.
- Built and integrated RESTful APIs to enable reliable communication between frontend applications, backend services, and database systems.
- Designed and managed relational and NoSQL data models using PostgreSQL and MongoDB, implementing database schemas, queries, and efficient data retrieval workflows.
- Optimized backend API endpoints and database queries to improve application performance, data retrieval efficiency, and overall user experience.

Projects

MeetAI – AI Meeting Intelligence Platform — *React.js, Node.js, Express.js,PostgreSQL*

- Engineered an AI-powered meeting intelligence platform using React.js and Node.js to centralize meeting management and automate post-meeting workflows.
- Developed RESTful APIs using Node.js, Express.js, and FastAPI for meeting creation, participant management, meeting metadata, and communication between application and AI services.
- Built AI processing workflows for automated meeting transcription, contextual summarization, key discussion points, action items, and follow-up insights from meeting audio.
- Designed database models using PostgreSQL and MongoDB to manage users, meetings, participants, transcripts, and generated meeting insights with role-based access control.

AI-Powered Placement Management System — *React.js, Node.js, FastAPI, Python, PostgreSQL*

- Engineered a full-stack recruitment platform supporting students, recruiters, and administrators through streamlined placement management and application tracking workflows.
- Integrated an AI-powered Applicant Tracking System (ATS) for automated resume parsing and candidate-job matching, increasing matching efficiency.
- Developed secured RESTful API endpoints using Node.js and FastAPI for communication between frontend, backend services, and PostgreSQL.
- Implemented JWT-based authentication, authorization, and role-based access control to secure recruitment data and manage permissions across user roles.

Technical Skills

Programming Languages: C++, Python, JavaScript, TypeScript, SQL
Frontend Development: React.js, HTML5, CSS3, Tailwind CSS, Vite

Backend Development: Node.js, Express.js, FastAPI, REST APIs
Databases: PostgreSQL, MongoDB, SQL, NoSQL, Database Design
Tools and DevOps: Docker, Postman, Git, GitHub, CI/CD
Computer Science: Data Structures and Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks, Artificial Intelligence
